About

Guildrun is a Guildrun wiki and strategy guide for players who want to plan runs with the local Demo 0.5.1 archive. It brings together hero stats, rank paths, items, relics, enemy records, world encounters, team-building advice, and run strategy in one searchable place. The site is organized around practical decisions: which hero fills a role, which formation solves a matchup, and which upgrade path improves the next fight.

What is Guildrun?

Guildrun is a Guildrun wiki and strategy guide built around the local Demo 0.5.1 archive. It

reference data with decision-focused guidance. The app presents a set of game databases and short guides rather than a live game client, so it works best as a planning companion for understanding heroes, items, relics, enemies, and formations.

The reference totals shown on the site are substantial: 25 heroes, 162 items, 322 relics, and 246 formations. That makes Guildrun useful when you need a Guildrun wiki that is more than a simple glossary. It is set up to answer questions like which hero has a useful base kit, which relic changes a fight, or what formation size is appropriate at a given stage of a run.

Key features

Guildrun combines several kinds of Guildrun wiki reference material in one interface:

- **Heroes roster:** Compare classes, range, rank paths, specializations, and modifiers across the 25-hero archive.
- **Items and relics:** Inspect effect text and use them to understand how a build changes over time.
- **Enemy and world references:** Read enemy records and world encounters so you can prepare for first contact instead of reacting late.
- **Formations:** Look up stage formations and use them to identify opening boards and later transitions.
- **Guides:** The site includes beginner guidance, a player handbook, a growth route, and learn-to-play pages that explain the run loop.
- **Search and navigation:** The homepage highlights a guide structure that is designed for fast lookup rather than long browsing.

Guildrun is especially useful when you want a Guildrun wiki that connects data to strategy. The pages do not just list objects; they also explain job coverage, position control, when to specialize, and how to spend Shards after a loss.

How to use it

1. Start with the **Beginner Guide** if you are new to the run loop.
2. Open the **Heroes** roster to compare classes, range, rank paths, and specializations.

Review **enemies** and **formations** before a hard stage so the opening board matches the first threat.

Follow the **Growth Route** when you want a step-by-step plan from opening board to final shape.

Use the **Player Handbook** after a failed run to diagnose what went wrong and what to change next.

The site's own guidance is practical: one clear job per slot early, then better specialization once the board is stable. In other words, Guildrun acts like a Guildrun wiki with coaching built in, which makes it easier to turn raw reference data into a working run plan.

Who it is for

Guildrun is a good fit for players who want a Guildrun wiki while learning the game's systems or refining their route. It is useful for:

New players who need a clear explanation of the run loop, role coverage, and Shard spending.

Returning players who want to refresh hero, item, and relic data from Demo 0.5.1.

Theorycrafters who compare heroes, rank paths, and modifier choices.

Run planners who care about formations, opening boards, and enemy contact ranges.

Guide readers who prefer structured references over scattered notes.

Because the archive is tied to Demo 0.5.1, the app is most valuable for study, comparison, and prep. It is not positioned as a live match companion or a general-purpose wiki for every version.

What to know before you use it

Guildrun is a Guildrun wiki for the local Demo 0.5.1 archive, so the data you see is version-specific. That is important if you are looking for current balance, because hero ranks, item effects, relic behavior, or formations can change in later builds. Use the site for the demo data it documents, and confirm anything version-sensitive against an

The site is a reference and planning tool, not the game itself.

It helps you compare options, but it does not play the run for you.

Some advice is framed as strategy guidance, so it may not guarantee a win in every matchup.

If you need the latest live data, an official source should take priority over this Demo 0.5.1 archive.

Even with those limits, Guildrun is a strong Guildrun wiki for understanding how a run comes together. If you want to plan better choices, read the guide pages, compare the databases, and use the archive to make each next decision clearer.
